

BSMART Series

The Bogliaco Marina is located on the Brescian coast of the fascinating and breathtaking panorama of Garda Lake. This port is protected by a marvellous natural environment, and an excellent geographic location with regards to the wind directions and the gulfs and bays which are very easy to reach; this provides all sailing and motorboat lovers with the possibility to find everything that suits their needs.

RISK PROFILE

- Temperature variations with risks of condensation;
- Use of sockets by untrained operators;
- Sun irradiation up to 1,20W/sqm;
- Presence of fuel and engine oil;
- High risk due to hail stones and acid rain;
- Customisation of the tower.

THE SOLUTION

- Casing in AISI 316L stainless steel with transparent panel to illuminate the walkway;
- The IP56 protection rating guarantees they are water and dust-proof even when the flap is open;
- Electrical components are segregated inside watertight insulated enclosures to guarantee dual insulation;
- No maintenance is required, the steel used is non-toxic, flame-proof, smoke-proof and rodent-proof.
