

TAIS Series

TAIS MIGNON

The seasoning facility is an avant-garde concern developed to comply with European health and quality standards. The SI Invernizzi plant is located in Treate, with a covered area of 10.000 sqm and a storage capacity of 100.000 forms.

**RISK PROFILE**

- Warm-humid micro-climate created by the heat generated by the multi-purpose boilers and the stewing processes;
- Extremely high humidity level due to the use of water jet and pressure steam cleaning machines to wash the equipment;
- High levels of vibration from pumps, forming machines and the automatic feed system.

**THE SOLUTION**

• Excellent resistance against humidity. Powders and pressurised steams;

• THERMOSETTING sturdy and robust system which can guarantee air tightness under all conditions;

• Watertight gland to protect against water jets and the penetration of oxidising substances;

• Interlocked sockets fitted with AC23A - AC3 category isolator switch.
